Performance review

The company performed well in the first half of the 2008 financial year, despite continued unprofitable pricing by our state-owned competitors, some material non-recurring costs and a record high fuel price. Attributable earnings increased by 14% to R60 million (comparative period: R52 million) resulting in headline earnings per share of 14.8 cents relative to 13.1 cents in the comparative period.

Turnover grew by 12% through improvement in both yields and volume. The R60 million increase in the fuel bill was partially offset by the operating efficiencies achieved by the fleet upgrade programme, with the new aircraft being 15% more fuel efficient than the MD82 aircraft that they replace. Non-recurring costs of R15 million were attributable to the expansion of routes out of Lanseria airport, and the delayed delivery of new aircraft.

Prospects

We anticipate that the fuel price will remain high for the foreseeable future and also anticipate a slowing of the market growth rate. We will, however, continue to achieve further efficiencies through the fleet replacement programme which will be completed by the end of our financial year. The new fleet will also achieve improved reliability and customer satisfaction. Our core airline growth will focus on additional services out of Lanseria airport and our network into Africa.

Continued expansion of our extended businesses, such as our recently launched kulula.com travel portal, will further diversify our future earnings base. Our investment in the ground handling venture, Commuter Handling Services, and our air freight venture, Imperial Air Cargo, are expected to perform well and to contribute to earnings.

The great strength and commitment of our people and

the quality of our brands bode well for the future.

Dividends

No interim dividends have been declared as it is company policy to declare one dividend annually.

Basis of preparation

In terms of the Listing Requirements of the JSE Limited, the Group is required to prepare the consolidated financial statements in accordance with International Financial Reporting Standards ("IFRS") and IAS34. The accounting policies used in the preparation of these results are consistent in material respects with those used in the financial statements for the year ended 30 June 2007.
